

Digital Forensic Basics

This 2-Day BlackBag Technologies course provides a hands-on approach toward learning digital forensic concepts and analysis techniques for authenticating, analyzing and reporting digital evidence found on computers and smartphone devices. Students will learn scenario-based investigative techniques. Students will use BlackLight forensic technologies and gain the skills and knowledge needed to certify as a BlackLight Certified Examiner.

Expert trainers from BlackBag will cover the best investigations techniques and digital forensic methodologies across all four major platforms (Windows, Android, iPhone and Mac OS X) in case-based, real-world scenarios.

The course will culminate in an opportunity to take the exam for BlackBag's new Certified BlackLight Examiner (CBE) designation, available only through this course and BlackBag's training team.

Course Topics and Learning Points:

- Digital Forensic Concepts
- Practical case techniques through the use of BlackLight
- Conduct digital forensic examinations on all four major platforms
 - Microsoft Windows
 - Android
 - iOS
 - Mac OS X
- How to do Cross-Platform digital forensic examinations
- Analysis techniques for authenticating, analyzing and reporting digital evidence
 - Computers
 - Smartphone devices
- Advanced functions of BlackLight
- BlackBag's new Certified BlackLight Examiner (CBE) designation, available only through this course
